Medications are categorized by common therapeutic conditions in this Preventive Therapy Drug List for ease of reference only. These categories do not determine coverage for the medication for your condition. Your benefit plan determines how these medications may be covered for you and at what cost. Therefore, certain products, categories, strengths, dosage forms, or formulations may not be covered. Please note that over-the-counter products require a prescription. The ability to obtain medications listed on this Preventive Therapy Drug may be limited by federal, state, or local laws or regulations such as expiration dates or limits on the number of refills.

If there are differences between your plan design and this Preventive Therapy Drug List, your plan design will dictate final coverage status.

If you have any questions regarding the coverage of any particular drug under your benefit program, you may:

1. Call the Member Services number located on the back of your prescription drug identification card;
2. Refer to your plan-specific documents; or
3. Contact your plan administrator for further information.
